- Oilfield Operator (10 Years)
- Website Designer (10 Years)
- General Contractor (5 Years)
- Salesperson (4 Years)

Dear Hiring Manager,

I'm currently seeking an opportunity in the energy or construction fields. My knowledge of technical design, oilfield operations, sales, and the construction field has prepared me to become a versatile asset to your team.

My knowledge and skills in mechanical and technical areas and my knowledge of oilfield and construction operations allow me to handle situations with the understanding of the importance of safety, efficiency and productivity. I am very familiar with the proper use of PPE and harnesses, have been certified by OSHA and have operated forklifts on a periodic basis.

Thank you for your time and consideration. I look forward to learning more about a position and your company's environment. My experience and skills can provide your team with an addition that prides himself for being reliable, doing a good job and being a team player. Please contact me with questions about my qualifications or to discuss my potential role with your company.

Sincerely,

Ashton Cox

Objective	I am a very active person that spends as much time outdoors as possible so I'm seeking work in the energy or construction fields. I am a team player, work well in groups as well as alone. I intend to advance in position and become an important asset of the company.	
Important	I do not drink, smoke, or do drugs and have a perfect driving record. I also have extensive understanding and skills of the construction business and am aware of the importance of utility marking. I have been OSHA certified several times so I am aware of what's necessary for safe work environments and practices.	
Education	University of Houston <i>Bachelor of Science in Management</i>	3.2 / 4.0 GPA
Professional Experience	Web Designer & Sales Representative July 2021-May 2026 <i>Bad Ass Websites, Bizash, 10X Town, etc.</i> Responsibilities include phone sales, business profile management, and website development. I analyze Google business profiles for daily contact lists and commence with direct phone sales, and then craft amazing websites to suit our client's needs.	
	MWD Operator (Contract Job) February 2024 - March 2024 <i>Phoenix Technologies (Upstream International)</i> Responsibilities include many of the previously mentioned MWD tasks, as well as experience with the Phoenix Velocity dual-telemetry EM/MP tool, PHX Surface System, Connect Systems, Field Cap, and Conoco Phillips' WellData Systems. Other vital tasks unlike the past jobs are running multiple reference lines and long distance antennas, and perform DAO offsets for motor highside procedures.	
	Lead MWD Field Engineer July 2019-August 2020 <i>Gordon Technologies</i> Responsibilities include preparing MWD's for operation: Rig up of equipment and ensure that it is functional, assemble and test. Verify all third party requirements. Operate and monitor MWD services on location, operate the retrievable MWD, gamma logging, assist with disassembly of tools in a safe manner and ensure packed and manifested for return. Other skills include: Work safely at all times and ensure that all safety standards are met and maintained, provide the external customer with relevant information regarding job progress, problems and solutions and provide accurate job data, assist in recording operational data and complete relevant job documentation to include daily reports, survey calculation reports and logs for tool/equipment run times, assist in ensuring the company assets on location are maintained in good working order and are protected from damage and that adequate supplies and equipment are present at well site at all times, comply with all corporate and local requirements. Tools that I have experience with include: Retrievable MWD tools and Noralis Communication Systems. Promptly complete OSHA and Grainger certifications.	
	Lead MWD Field Engineer June 2018-July 2019 <i>ProDirectional</i> Responsibilities include all of the previously mentioned MWD tasks, as well as experience with retrievable MWD tools, XXT and Benchtree Communication Systems, Gamma, and PWD tools. Promptly complete OSHA and Grainger certifications. I also have experience strapping Directional tools, as well as basic experience using the Winserve software, and sliding for the DD on D&I jobs.
